LIVE AI INTERPRETATION

# Every guest hears you in their language.

Real-time interpretation and live captions for in-person events, delivered to your attendees' own phones. No booths. No receivers. Nothing to hand out.

THE EXPERIENCE

# Three steps for your guests

SIM-TRANS Translation Services
we speak your language

Nothing to download, nothing to collect at the door. Attendees use the phone already in their pocket.

1

## Scan

A QR code on the table card, the badge or the screen. One scan opens the page. No app, no account, no sign-up.

2

## Choose

Every available language, listed in its own script. One tap and they are connected.

3

## Listen

Live interpretation through their own earbuds, with captions on screen to read along.

CAPABILITIES

# Built for event organisers

SIM-TRANS Translation Services
we speak your language

### 81 languages

From Arabic and English to Japanese, Hindi, Filipino and Swahili. The full list is in the appendix.

### 12 at the same time

One speaker, twelve simultaneous language channels. Adding a language is a setting, not another booth.

### Live captions

On-screen text in the attendee's chosen language, ideal for noisy rooms and guests who prefer to read.

### Two-way panels

When a speaker switches language mid-session, the system follows automatically. Every channel keeps working.

### Unlimited listeners

Twenty guests or five hundred. No receivers to rent, distribute, sanitise, chase or replace.

### Recordings

A clean audio recording of every language channel, delivered after the event.

### Transcripts

Full written transcripts per language, ready for minutes, reports, compliance files or translation sign-off.

### Subtitle files

Standard caption files for every language, so your event video is subtitled without a second project.

### Custom glossary

Load your terminology before the event, from legal terms to product names and executive titles, and it is applied consistently throughout.

### Works with your venue

Connects to the audio system your venue already has. Our team handles the setup; your AV crew carries on as normal.

### Confidentiality

Private session access, recordings held only as long as you want them, and deletion on request. Built for legal-sector clients.

### Human interpreters too

We are a translation company first. Where a session demands certified human interpretation, we provide it.

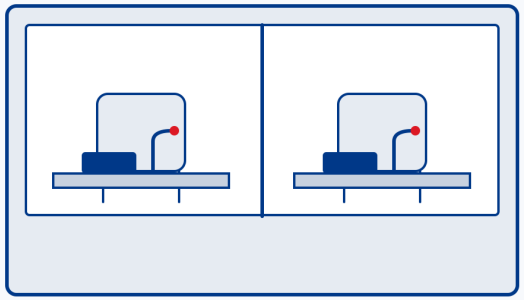

THE DIFFERENCE

# Compare the setups

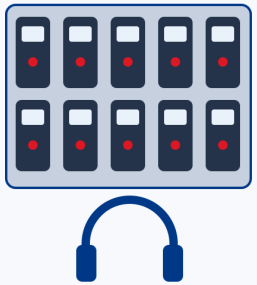

SIM-TRANS Translation Services
we speak your language

Both approaches use the audio feed your venue already provides. Everything after that point changes.

## Traditional interpretation

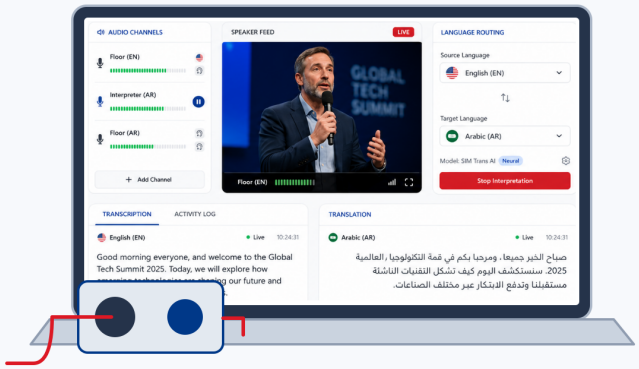

**Booth + consoles**

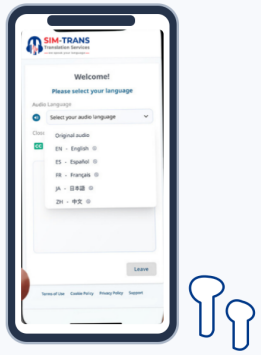

**Receivers + headsets**

## SIM.AI

**Laptop + audio interface**

XLR and USB cables

**Personal phones**

and earbuds

### Nothing to build

No booths in your floor plan, no equipment tables at the back of the room, no cable runs across the venue.

### Nothing to hand out

No receiver counts, no deposits, no collection queue at the door, no units lost between sessions.

### Nothing to rebuild

A late request for another language is a change of setting, not a change of budget and floor plan.

AFTERWARDS

# What you receive

SIM-TRANS Translation Services
we speak your language

Every session produces a complete multilingual record, included as standard.

## Audio recordings

For each language

For your archive
Audio of every language channel, stored only as long as you want it.

## Transcripts

For each language

For your minutes
Written transcripts per language, ready to edit and circulate.

## Caption files

For each language

For your video
Standard subtitle files, so your event footage ships multilingual.

## Usage report

Event usage overview

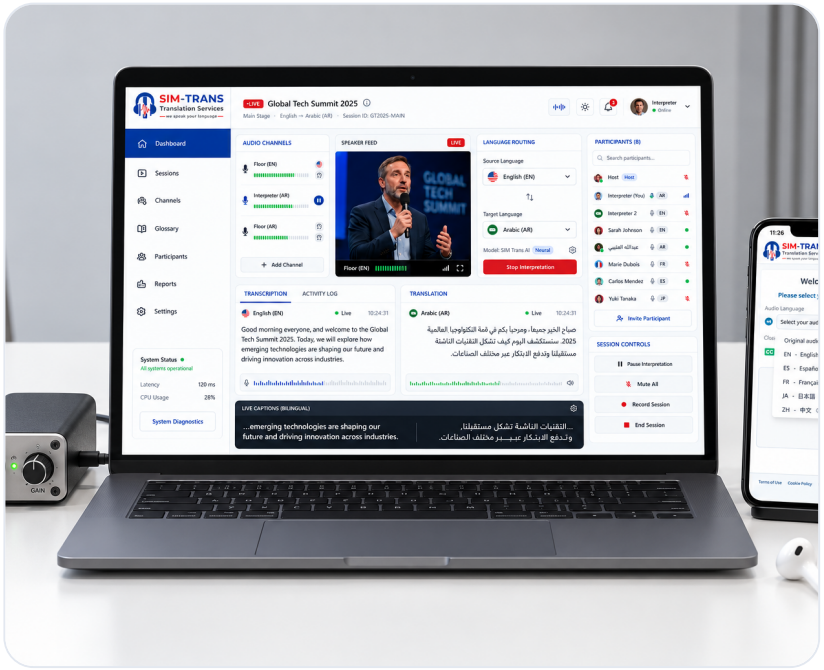

For your report
Languages used, session duration and how many guests listened in each.

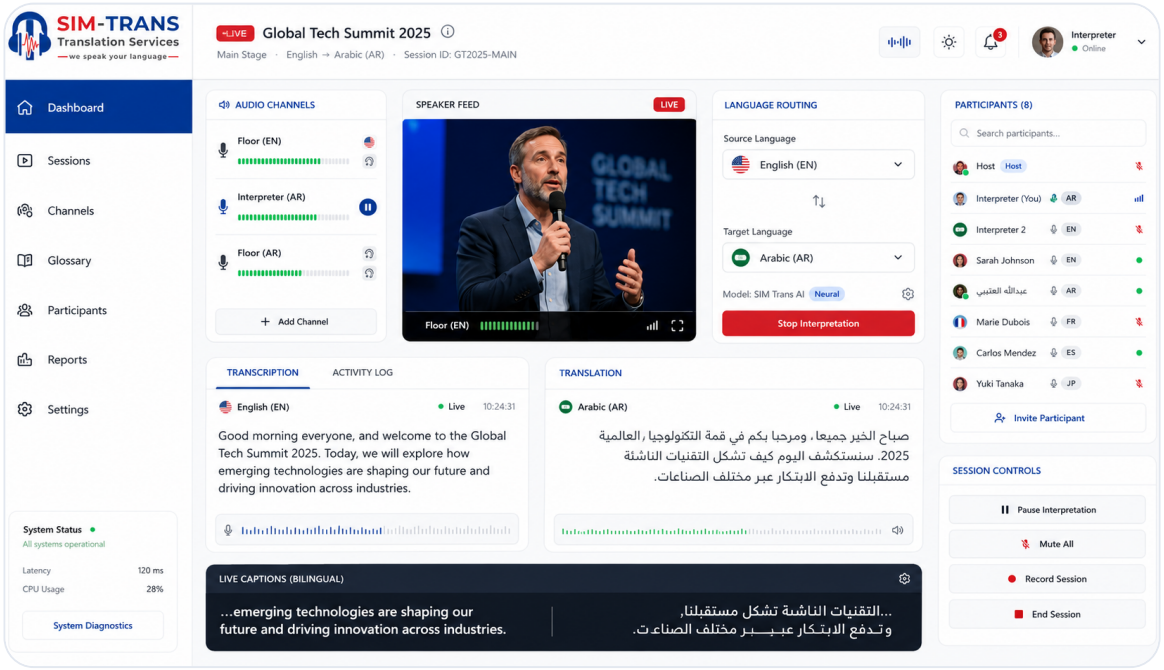

ON SITE

# A footprint you barely notice

SIM-TRANS Translation Services
we speak your language

Our team connects to your existing audio, monitors the session throughout, and stays out of the way.

## Set up in minutes

One discreet position at the side of the room. No rigging, no room changes, no impact on your run sheet.

## Monitored live

Every language channel is watched in real time throughout your event, so problems are caught before your guests notice.

## Run by us

You never touch the system. Your AV crew continues exactly as they always do.

COVERAGE

# Speak to everyone in the room

SIM-TRANS Translation Services — we speak your language

A Gulf audience is rarely one language. Cover the room without adding a booth for each one.

AVAILABLE

**81**

## Available languages

Examples from the language selection

- English
- Français
- Español
- Deutsch

UP TO

**12**

## Simultaneous languages

From one audio feed

| | | | |
|---|---|---|---|
| 01 | 02 | 03 | 04 |
| 05 | 06 | 07 | 08 |
| 09 | 10 | 11 | 12 |

## One feed, many rooms in one

Arabic and English are the starting point for most events here. Add Hindi, Urdu, Filipino, French or Mandarin and the room opens up, with no extra equipment and no extra logistics on the day.

Twelve of the eighty-one can run at the same time from a single audio feed. The complete list is on the next page.

## Conferences and summits

International delegates follow the main stage in the language they think in, not the one on the programme.

## Corporate and government

Town halls, board meetings and training sessions where the room speaks four languages and the message cannot blur.

## Legal and professional

Proceedings and briefings where an accurate record afterwards matters as much as understanding on the day.
